

FAQ - Material Provisions

WINDOWS

Our scope of work does not cover the provision of windows or window screens. However, our package of deliverables encompasses a comprehensive range of window treatments, including drapery, shades & rods.

PLUMBING

Our team will guide you in selecting the perfect finish plumbing options including faucets, toilets, and sinks. However, rough plumbing installation falls outside our scope of services, and will require consultation with a contractor.

COUNTERTOPS

If opting for a natural stone for your project, we will help provide inspiration for your selection. While we're unable to provide direct links to stone, as each slab varies in its unique veining, rest assured that we will provide guidance and materials to help make your selection process easier.

If you decide on Quartz or other man-made materials, we can connect you with retailers who can ship directly to your local stone fabricators. We will help you find the best possible options for your specific needs.

FLOORING

When it comes to sanding and finishing wood flooring, custom stains are typically used, inspired by specific designs. Your contractors and flooring experts will provide you with several stain samples

to choose from, and we will assist you in selecting the most suitable one. For LVP or prefabricated flooring, we will guide you in choosing the right materials from local retailers or your contractor's preferred vendors.

CABINETRY

We provide optimized cabinetry layouts for your space. However, we do not offer customization services for the interior organization of your cabinetry designs. In order to ensure the best service possible, please inform us whether you are interested in custom cabinetry or prefabricated/semi-custom cabinets. We do not provide prefab cabinet drawings.

APPLIANCES

We do not source kitchen appliances. To ensure our design plans account for all necessary appliance measurements, we kindly request that you select your primary appliances prior to beginning your virtual design project with us. If you are interested in incorporating panel ready appliances, please let us know so that we can include them in your deliverables.
